7.1.2

The evolution of the nose and the nasal cavity

cf. $\text{Eqs.} \, \text{(1)}$ and $\text{(2)}$. The nose and the nasal cavity are part of the respiratory system and play a crucial role in the function of the body.

The nasal cavity is divided into the nasal fossa and the nasopharynx. The nasal fossa is further divided into the anterior and posterior parts.

The anterior part of the nasal fossa is divided into the left and right nasal cavities. Each nasal cavity is divided into the nasopharynx, the nasal cavity, and the posterior part.

The nasal cavity is divided into the superior and inferior parts. The superior part is further divided into the anterior and posterior parts.

The posterior part of the nasal cavity is divided into the middle and inferior parts. The middle part is further divided into the anterior and posterior parts.

The inferior part of the nasal cavity is divided into the anterior and posterior parts. The anterior part is further divided into the left and right nasal cavities.

The posterior part of the nasal cavity is divided into the middle and inferior parts. The middle part is further divided into the anterior and posterior parts.

The inferior part of the nasal cavity is divided into the anterior and posterior parts. The anterior part is further divided into the left and right nasal cavities.

The nasal cavity is divided into the superior and inferior parts. The superior part is further divided into the anterior and posterior parts.

The posterior part of the nasal cavity is divided into the middle and inferior parts. The middle part is further divided into the anterior and posterior parts.

The inferior part of the nasal cavity is divided into the anterior and posterior parts. The anterior part is further divided into the left and right nasal cavities.

The nasal cavity is divided into the superior and inferior parts. The superior part is further divided into the anterior and posterior parts.

The posterior part of the nasal cavity is divided into the middle and inferior parts. The middle part is further divided into the anterior and posterior parts.

The inferior part of the nasal cavity is divided into the anterior and posterior parts. The anterior part is further divided into the left and right nasal cavities.

The nasal cavity is divided into the superior and inferior parts. The superior part is further divided into the anterior and posterior parts.

The posterior part of the nasal cavity is divided into the middle and inferior parts. The middle part is further divided into the anterior and posterior parts.

The inferior part of the nasal cavity is divided into the anterior and posterior parts. The anterior part is further divided into the left and right nasal cavities.

The nasal cavity is divided into the superior and inferior parts. The superior part is further divided into the anterior and posterior parts.

The posterior part of the nasal cavity is divided into the middle and inferior parts. The middle part is further divided into the anterior and posterior parts.

The inferior part of the nasal cavity is divided into the anterior and posterior parts. The anterior part is further divided into the left and right nasal cavities.

The nasal cavity is divided into the superior and inferior parts. The superior part is further divided into the anterior and posterior parts.

The posterior part of the nasal cavity is divided into the middle and inferior parts. The middle part is further divided into the anterior and posterior parts.

The inferior part of the nasal cavity is divided into the anterior and posterior parts. The anterior part is further divided into the left and right nasal cavities.
